

I am a XM radio subscriber and absolutely love the service. I think that it is ridiculous for the NAB to propose such a petition! FM and AM radio have had a monopoly on the radio market for far too long, and I think it is about time that there is another choice out there! The NAB is scared that XM offerers what they can't and they are attempting to make it so they can maintain their monopoly over the radio industry. They underestimated the power that XM has become and they are trying to stifle it. Our country was based on the ideas such as the right to have freedom of speech and for the economy to be free of monopolies. Make the NAB monopoly end now!!!!
